Attn: Ashley McLauchlan

Dear Mr McLauchlan

**Wilsons Creek Slip- Micropiled Anchored Wall - Contract No. 2013-0036**

I would like to formally express my gratitude to the ARK Construction Group (ARK) and your team of sub-contractors and consultants involved in the successful delivery of the Wilsons Creek Landslip Remediation Project.

As the Principal's Representative for the delivery of the project I was very impressed with the highly professional and capable Construction Team that ARK employed throughout the project.

It is acknowledge that the success of a project like this relies on a team effort, however I would like to commend your Site Engineer, Ding Wuen Liw, and Site Manager Ian McManus on their outstanding contribution to the delivery of the project. Ding and Ian displayed great competence during the design and construction phases and I was impressed with the level of dedication and attention to detail that both demonstrated throughout my association with them on this project

The remediation work was completed under a Design and Construct Contract, on time, within budget and to a very high standard of workmanship. I have no hesitation in recommending ARK for similar work in a future.

Yours sincerely

Tony Nash

## Office of the Mayor – Cr Don Waugh

### RE: Completion of Restoration Works – Waratah and Dahtlers Bridges Reconstruction Contract

I would like to express Council's appreciation for your team's performance in completing the above contract. Your team has delivered quality work, in tight timelines, which has been acknowledged by both Councillors and the general public.

The team's handling of issues raised by both Council and the general public has been both prompt and professional. Your input into the local economy and the assistance given to community groups has been warmly appreciated by a community recovering from the effects of the 2013 flood event.

I would request that you pass on Council's appreciation, on behalf of the North Burnett community, to your staff and subcontractors for their efforts in rebuilding North Burnett.

Yours faithfully

Cr Don Waugh  
Mayor  
North Burnett Regional Council.

I wish to acknowledge the excellent work your company has completed for Queensland Rail on the emergency pier repair of the rail bridge at Toombul.

These works were completed on schedule and on budget under very challenging circumstances. I appreciate the professionalism of your staff in mobilizing rapidly and completing the work safely and in an environmentally sensitive environment.

I am happy for you to use this reference for your company's future works.

Kind regards

**Somerset Regional Council**

Dear Mayor,

I would like to take this opportunity to congratulate and thank all those involved with the recent gravel road maintenance works undertaken on Mount Byron road, Mount Byron, through to number 1941.

The road has basically been rebuilt after the January floods which destroyed much of it's formation and caused damage to most creek crossings.

I would like you to pass on our thanks to all Council staff involved in the decision making process and in particular, I would like you to thank the contract staff who undertook the works in a most professional and ordered fashion. Supervisor Ian was very easy to deal with, polite and explained their actions clearly. They, themselves worked under difficult circumstances at times including more wet weather.

Our neighbor, Mark Werner has asked us to also pass on his thanks for a job well done.

I understand that work continues on pavements and the reconstruction of some creek crossings but we feel we must send our thanks for the works already undertaken and show some appreciation prior to completion.

Our sincere thanks again.

Ross and Cheryle Pountney  
Mark Werner and Family

**GATEWAY UPGRADE PROJECT**  
Safety Performance Free Flow Tolling Project

I wish to record our appreciation for your company's efforts in ensuring the safe delivery of your works while engaged for Queensland Motorways. Interfaces between separate construction projects usually pose higher risks due to potential conflicts and competing interests. The interface between the free flow tolling works conducted by ARK and LAJV has been successful.

Effective communication is fundamental to sound safety performance and at all times ARK has commenced works with adequate briefings, notice and submission of the required documentation.

At all times during the conduct of your works the experience has been positive. Your workforce and subcontractors have demonstrated a real commitment to achieving excellent safety standards and improving safety performance. Wherever issues were raised, they were met with real co-operation and a commitment to improve.

I look forward to any future dealings we may have.

Yours faithfully

**Port of Quintell Beach  
Barge Ramp Upgrade 2007 Design and Construction Contract  
Reference: PI/18/000/QB001-07**

I wish to advise of my appreciation to you and your team for your efforts in assisting with the upgrade of the Barge Ramp at the Port of Quintell Beach. Ark Constructions Group's commitment to achieving the best possible outcomes for PCQ is both acknowledged and greatly appreciated.

Your high level of organisation and planning has greatly contributed to the success of these works and has been a great help to the local community. Construction of the new concrete roadway was completed earlier than scheduled and within budget which we are delighted with.

The project was completed to a very high standard in an extremely remote environment with no interruptions to the operational use of the ramp much to the satisfaction of the local community.

The works completed were on a cost plus basis and Ark Constructions Group's record keeping and detailing of all costs was exemplary.

There was a high risk exposure associated with this project which Ark Construction Group dealt with and handled in the most professional manner with no incidents occurring during the project.

On behalf of PCQ I wish to again extend my deepest thanks for your contribution to these works.

Regards,

**Attention: Mr Adrian Vesnaver**

Dear Adrian

Acting as delegated authority on behalf of Gold Coast City Council and Queensland Department of Sports and Recreation, the Joint Funding Partners for the Macintosh Island Pedestrian Bridge, we are pleased to learn the Ark Construction Group Austress Freyssinet Joint Venture will be submitting the project into the 2008 Footbridge Awards. We provide full support for the submission and wish the best of luck.

The project demonstrated tremendous collaboration and coordination between all parties including contractors, designers, architects and authorities which should be applauded.

Should you need any further information to support your documents in submission please do not hesitate to contact myself.

Kind regards

Dear Messrs Mowat and O'Donnell

Thank you for your Joint Venture contribution to the construction of the new bridge over the Nerang River in the MacIntosh Island Park Precinct.

I know the project posed several challenges, not the least of which were very restrictive timeframes. I have been advised by the Department of Sport and Recreation that your Joint Venture demonstrated a high level of professionalism, innovation, planning and project management skills to construct the bridge on time and within budget.

I attended the 2007 Lexmark Indy 300 and saw first hand the benefit the new bridge brought to the successful conduct of the event, significantly increasing access from MacIntosh Island to Narrowneck beach and improving pedestrian flow throughout the precinct.

Your tireless efforts on this project are appreciated.

Yours sincerely

**Judy Spence MP**  
Minister for Police, Corrective Services and Sport
